

Generating a Key Pair and Exporting a Public Key

To receive payments via Android Pay, you need to create a key pair (private and public key) and transfer the public key to Android Pay. To create a key pair and export a public key, follow these steps.

1. In the top panel of your personal account, select **Administration > Certificates > Android Pay Certificates**.
2. To form a key pair, in the section **Work with keys** click on the button **Generate key pair**.
3. In the window that appears, configure the settings referring to the table below.
4. Click **Save** – the created key pair will be displayed in the table below.
5. Click on the created key pair and in the **Working with keys** section click on the button **Upload CSR**.
Depending on your browser settings, a message may appear prompting you to open or save the public key file.
6. Save the file.
