

# Business.Ru

<b>1</b>	Read the information about <a href="#">principles of work</a> .
<b>2</b>	Review <a href="#">connection options</a> to the Business.Ru service.
<b>3</b>	Review <a href="#">service rates</a> .
<b>4</b>	<a href="#">Register</a> in the personal account of the provider of the fiscalization solution.
<b>5</b>	Configure the connection in <a href="#">personal account</a> of «Sberbank» payment gateway.

Integration with a payment gateway is not required if you use:

- [e-mail invoicing service](#);
- [payment links generator](#);
- work using [Yoom.Shop](#) (external link);
- work using the following CMS:
  - [1C-Bitrix](#);
  - [WordPress](#);
  - [Joomla!](#);
- use the transfer of goods by default from the fiscalization settings of the Sberbank personal account.

After making all the settings, we ask you to carefully check the correct filling of all fields in relation to the fiscalization parameters in the personal account of the bank, because the correctness of the transfer of fiscal data to the OFD and tax depends on this. We also recommend checking «in action» when sending a fiscal receipt.

In case of any difficulties or questions, you can send them to the address of the technical support of the bank [support@ecom.sberbank.ru](mailto:support@ecom.sberbank.ru) and Business.Ru [support@mail.business.ru](mailto:support@mail.business.ru).
